

JEFFERY F. SKINNER

12958 Shady Grove Ln, Montgomery, TX 77356 | 520-989-4736 | fawnlake1@icloud.com

PROFILE

Results-driven Facilities and Information Systems Manager with over 20 years of experience leading technology-driven solutions, simulator systems engineering, and infrastructure operations across global environments. Proven expertise in team leadership, project execution, and safety compliance, including recent OSHA and EPA certifications. Recognized for strategic planning, technical depth, and ability to deliver reliable systems that support business continuity.

Open to full-time onsite or remote opportunities, as well as consulting and short-term offshore or overseas project roles. Not seeking relocation.

PROFESSIONAL EXPERIENCE

IT & Facilities Manager

Maersk Training, Houston, TX | 2022 – March 2025

- Direct maintenance and operation of advanced training simulators and IT infrastructure to ensure optimal performance and minimal downtime.
- Served as Lead Technician responsible for Kongsberg Marine and Drilling Systems simulators and related systems.
- Lead collaboration with internal digital teams to develop and implement VR-based training solutions. Responsible for client facing VR demonstrations.
- Manage all facilities vendor contracts, ensuring strict HSE compliance, readiness, and timely resolution of issues.
- Oversee client-facing technology upgrades, enhancing delivery of safety-critical training programs.
- Identify system improvement opportunities and lead implementation efforts across multi-vendor environments.

CEO

AmperageApps AS, Stavanger, Norway | 2019 – 2021

- Provided strategic and technical leadership for full-stack development of IoT-based environmental monitoring systems.
- Directed hardware design, including circuit and PCB development for custom sensor systems.
- Built scalable cloud infrastructure supporting secure remote data access and analytics.
- Led business operations and engineering teams to improve reliability, efficiency, and client satisfaction.

Senior Technician – IS Business Services

Songa Offshore AS, Stavanger, Norway | 2011 – 2019

- Oversaw IT support operations for seven offshore rigs and multiple international shore offices.
- Led service desk operations supporting 500+ offshore and onshore users with Tier 1–3 technical support.
- Planned and executed major system upgrades, lifecycle transitions, and integration of key offshore systems.
- Coordinated with vessel management, HSE, and vendors to maintain secure and reliable VSAT and land-based communications.

Logistics Specialist

US Federal Emergency Management Agency (FEMA) | 2004 – 2011

- Deployed to high-impact disaster zones to establish communications, logistics, and field infrastructure.
- Managed large-scale equipment inventories, procurement processes, and maintenance operations.
- Ensured accountability and rapid mobilization of supplies supporting emergency task forces.

KEY COMPETENCIES
